

1

Logistics

- Course meeting times
- Breaks
- Facilities
- Technology requirements
  - Bring your own LLM account (BYO-LLM)
  - Have Flowise and Groq accounts created and configured
  - You must have access to the companion app
    - https://ai-native-companion.scaledagile.com

Note: the activities will be executed in your LLM of choice unless stated otherwise.

2

Working Agreements

Key points

- Be present, not perfect
- Be kind, Be respectful
- Take advantage of breaks
- **Important:** Do not put personally identifiable information (PII) or company-specific sensitive data into AI tools
- E.L.M.O

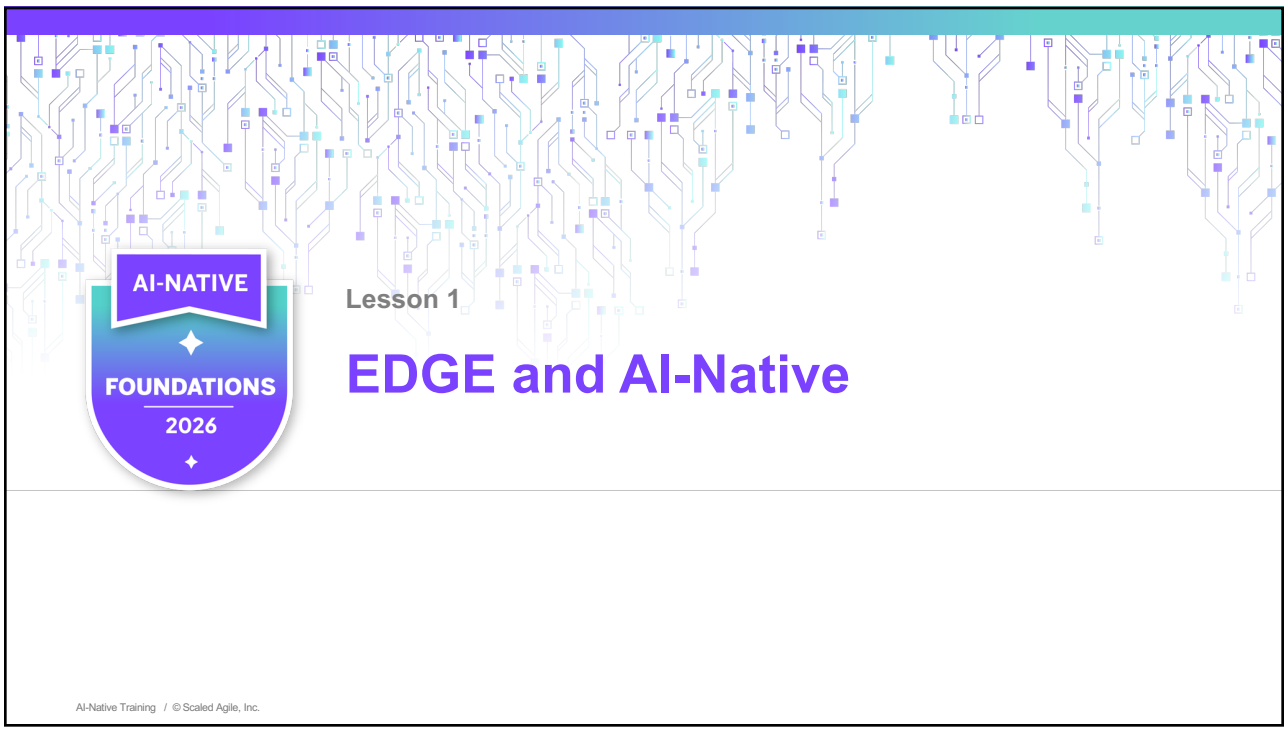

AI-Native Foundations: Course Outcome

By the end of this course, you will:

- **Develop** AI literacy and valuable applications
- **Deliver** measurable business impact
- **Transform** your professional value and organizational capability

You'll join the small percentage of professionals who don't just use AI tools, but who are AI-Native

5

Learning Objectives

By the end of this lesson, you will:

- Understand the four EDGE forces and their impact within your job and industry
- Define what AI-Native means for both people and organizations
- Translate the definition of AI-Native into your own work context

6

1.1 The EDGE World

7

Class Schedule

Day 1

Lesson 1: EDGE & AI-Native

- 1.1 | The EDGE World
- 1.2 | AI-Native

Lesson 2: AI Technical Literacy

- 2.1 | AI Basics
- 2.2 | Data
- 2.3 | Large Language Models
- 2.4 | Prompting and Safe Use
- 2.5 | Retrieval Augmented Generation (RAG)
- 2.6 | AI Agents
- 2.7 | Frontiers In AI

Day 2

Lesson 3: The AI-Native Success Factors

Lesson 4: Improve My Workflow With AI

Lesson 5: AI as Your Thought Partner

Lesson 6: Roadmap to AI-Native

Lesson 7: Tell Your AI-Native Story

8

What Kind of Change Are You Feeling?

5 min

Group discussion

Go around your table and introduce yourself using your name, role, where you're based, and complete this sentence:

“Ever since AI has taken over the headlines, I’ve felt....”

Note: Answer from your personal or organizational experiences…

The EDGE Imperative

Four forces reshaping everything. Think of these as the new rules of how work happens.

Exponential
Rapid technological growth

Generative
AI’s creative capabilities

EDGE

Disruptive
Industry-wide transformations

Emergent
Unpredictable system behaviors

Exponential: Change at Lightning Speed

'Things don't just change fast—they double, then double again.'

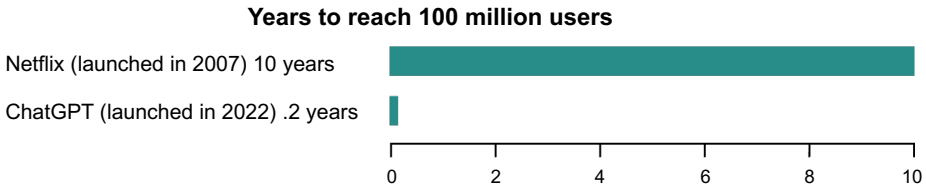

- Change happens at breakneck speed and keeps building on itself
- What used to take years now happens in months or weeks

> "AI advances at five times the speed of the internet and produces three times the impact."
> —**John Chambers**, former CEO of Cisco

Disruptive: The Rules Keep Changing

'Just when you think you know how things work, everything shifts.'

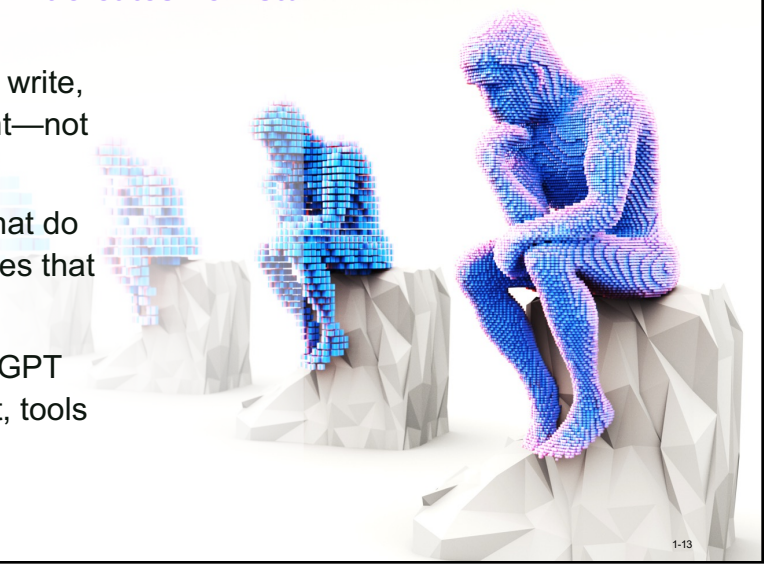

- **What it means:** Entire industries get turned upside down almost overnight
- **Think about:** How Netflix killed Blockbuster or how Uber changed transportation
- **Today's reality:** AI startups are reaching $200 million in annual revenue faster than any previous tech generation[1]

**Data compiled from public sources, including company filings, press releases, and verified statistics*
[1] https://www.msn.com/en-gb/money/topstories/ai-application-start-ups-become-big-businesses-in-new-tech-race/ar-AA1CRnQv

Generative: Machines That Create

'AI doesn't just follow orders—it creates new stuff.'

- **What it means:** AI can now write, design, compose, and invent—not just automate
- **Big shift:** From machines that do what we tell them to machines that create alongside us
- **Examples you know:** ChatGPT writing emails, AI making art, tools designing websites

1-13

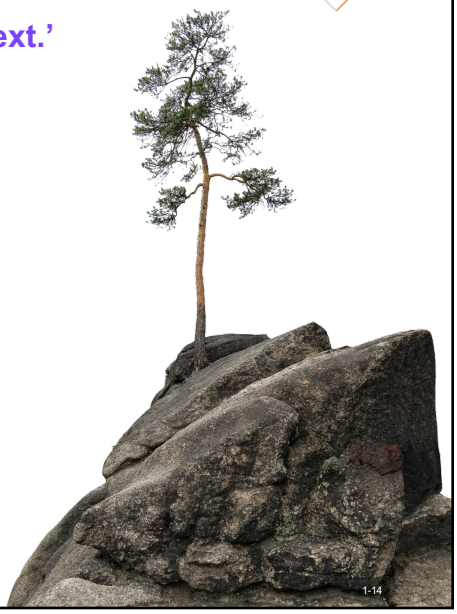

13

Emergent: Surprises Keep Happening

'Even the experts don't know what will happen next.'

- **What it means:** AI develops new abilities that nobody programmed or expected
- **Reality check:** Skills 'switch on' suddenly when AI reaches certain levels

> "AI with reasoning power will be less predictable."
> —**Ilya Sutskever**, Co-Founder, OpenAI

1-14

14

EDGE Reaction Lineup

5 min

Group activity

- **Step 1:** Walk over and stand by the sign that's had the biggest impact on your role or industry
  - Exponential
  - Disruptive
  - Generative
  - Emergent
- **Step 2:** Discuss with others at that sign. Why did you pick this one? How does it impact your organization?
  - Be prepared to share your reasoning with the class

Debrief

3 min

Class discussion

Each group shares: Which EDGE force you chose, one real example from your experience, and why it matters in your world.

Insights and Action

1 min

Reflect

Which of the four EDGE forces—Exponential, Disruptive, Generative, or Emergent—do you feel most personally in your current role? Write about a specific example from your work where you've experienced this force and describe what it means for how you need to think or act differently going forward.

Apply

Ask your LLM: “Analyze my industry [insert your industry] through the lens of the four EDGE forces: Exponential (rapid, compounding change), Disruptive (rule-changing innovations), Generative (AI creating new content), and Emergent (unexpected capabilities appearing). For each force, give me one concrete example of how it's reshaping my industry and one action I should consider taking to stay competitive.”

1.2 | AI-Native

Class Schedule

Day 1

Lesson 1: EDGE & AI-Native

- 1.1 | The EDGE World
- 1.2 | AI-Native

Lesson 2: AI Technical Literacy

- 2.1 | AI Basics
- 2.2 | Data
- 2.3 | Large Language Models
- 2.4 | Prompting and Safe Use
- 2.5 | Retrieval Augmented Generation (RAG)
- 2.6 | AI Agents
- 2.7 | Frontiers In AI

Day 2

Lesson 3: The AI-Native Success Factors

Lesson 4: Improve My Workflow With AI

Lesson 5: AI as Your Thought Partner

Lesson 6: Roadmap to AI-Native

Lesson 7: Tell Your AI-Native Story

What Comes to Mind?

5 min

Pair share

- With a partner:
  - Share what comes to mind when you hear 'AI-Native'
- Switch up and repeat

Note: There are no wrong answers, just first thoughts and feelings

AI-Native: What It Actually Is …

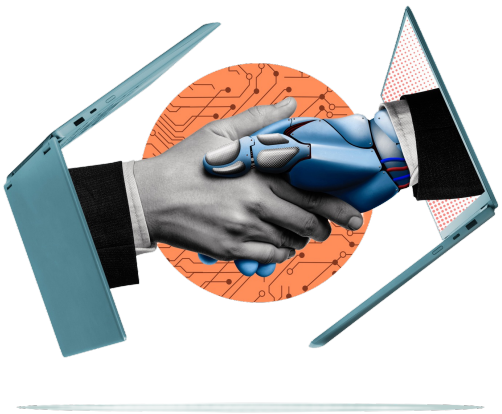

AI-Native is the state of relentlessly embedding AI in new ways of thinking and working to navigate and lead in the Age of AI.

Think of it like this: Just as 'digital natives' grew up with computers and the internet as natural tools, AI-Native people treat AI as a natural thinking partner.

AI-Native Professional

What does this look like for you?

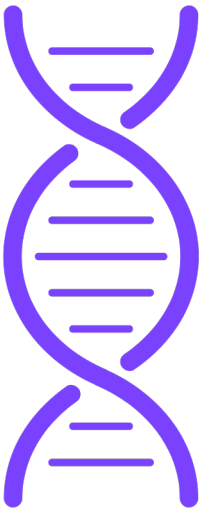

- An **AI-Native Professional** is someone who instinctively treats artificial intelligence as a default teammate in how they think, create, and deliver value.
- In simple terms: You automatically think "How can AI help?" instead of "I'll do this myself."

AI-Native Organization

What does this look like for companies?

- An **AI-Native Organization** is one where AI capabilities are structurally baked into its operating model rather than bolted on.
- In simple terms: AI isn't an extra tool; it's built into how everything works.

Bolted On vs. Baked In

- AI is separate from normal work
- Only some people use it.
- "Let's try this AI tool."

- AI is part of normal work.
- Everyone benefits from AI capabilities.
- "How do we design work with AI in mind?"

What AI-Native Means to Me

10 min

Individual activity

- **Part 1: Individually (3 min):**
  - **Ask the LLM:** *"What does it look like to relentlessly use in AI in my [role/job] + [additional context] rather than use AI as an afterthought?"*
    - Include your industry, role, and a few key points of the work you do into the prompt.
- **Part 2: As a group (5 min):**
  - Share your results.

Debrief

3 min

Class discussion

- Which of the AI's suggestions felt the most 'disruptive' to how you currently work, and what is stopping you from doing it that way today?

Insights and Action

1 min

Reflect

Think about a task you completed yesterday. Write about how your approach might change if you automatically asked, "How can AI help with this?" before starting. What would shift in your process, timeline, or outcomes?

Apply

Ask AI: "I'm about to [describe a specific work task you have coming up]. You're my thinking partner. Help me brainstorm 3 different ways AI could enhance my approach to this task, then suggest which approach might work best for my situation and why."

Lesson Review

You can:

- Understand the four EDGE forces and their impact within your job and industry
- Define what AI-Native means for both people and organizations
- Translate the definition of AI-Native into your own work context
