

1

Learning Objectives

By the end of this lesson, you will:

- Use a six-step method to redesign a personal workflow with AI
- Create a business brief that positions your redesign for approval

2

Class Schedule

Day 1

Lesson 1: EDGE & AI-Native

1.1 | The EDGE World

1.2 | AI-Native

Lesson 2: AI Technical Literacy

2.1 | AI Basics
2.2 | Data
2.3 | Large Language Models
2.4 | Prompting and Safe Use
2.5 | Retrieval Augmented Generation (RAG)
2.6 | AI Agents
2.7 | Frontiers In AI

Day 2

Lesson 3: The AI Native Success Factors

Lesson 4: Improve My Workflow With AI

Lesson 5: AI as Your Thought Partner

Lesson 6: Roadmap to AI-Native

Lesson 7: Tell Your AI-Native Story

3

Group Discussion

5 min

In this lesson, we will be improving a personal workflow. Let's first practice describing a process by breaking it down into discrete steps.

In your group, take turns explaining step-by-step how you make your favorite sandwich, in 30 seconds or less.

- Be specific:
  - "Open the fridge. Get the bread. Toast it ..."
  - "Spread mayo on one side. Stack turkey. Add pickles ..."

4

Clarity First, Then Enhancement

- Before we can improve our work with AI, we need to understand how the work flows, step by step.
- Think of it like GPS navigation: You need to know exactly where you are before you can plot the best route to where you want to go.

5

The Workflow Redesign Method – A Six-Step Process

A hands-on process with AI as your collaborator:

- **Step 1:** Capture your current workflow
- **Step 2:** Find the pain points
- **Step 3:** Imagine AI enhancements
- **Step 4:** Redesign the workflow
- **Step 5:** Find your first move
- **Step 6:** Draft your business brief

6

Step 1: Capture Your Current Workflow

12 min

Map your actual current process step-by-step

- To improve a process, you first must see it clearly. You'll now use an AI assistant to quickly map out one of your current workflows, step-by-step.
- Be ready to describe the specific steps, tools, and time involved in your workflow.
- *(Tip: Free-form your process first, then paste it into the LLM.)*

Step 2: Find The Pain Points

8 min

Identify the most frustrating parts of your process

- Now the AI will act as your analyst. Based on the workflow you provided, it will highlight potential pain points and suggest the best opportunities for AI enhancement.
- Your task is to compare the AI's suggestions with your own experience. Does its analysis match your reality?
- Tell the AI what it got right, what it missed, and if it spotted something new.

Step 3: Imagine AI Enhancements

8 min

Choose the best AI suggestion to start with

- With the best opportunities identified, it's time to brainstorm solutions. The AI will now propose several specific AI enhancements for your workflow.
- Review the AI's suggestions. Your task is to choose the single best option to focus on. Select the one that feels both highly impactful and realistic enough to be a successful first initiative.

Step 4: Redesign the Workflow

12 min

Generate and analyze the new, AI-enhanced version of your workflow

- Now for the exciting part. The AI will now generate a new, enhanced version of your workflow, showing you a clear "before and after" comparison. This is where you get to see the full potential of the changes.
- Your job is to analyze the new, AI-enhanced workflow. Pay close attention to the specific changes, what your new role would be, and the estimated time savings. What might you ask the AI to modify?
- *Optional: Ask the LLM to visualize this as a flowchart or quantify time savings.*

Step 5: Find Your First Move

8 min

Pinpoint the core value and a concrete next step

- An idea is only as good as the action it inspires. For our final step, we'll examine your redesigned workflow for two key things: its single biggest benefit, and the very first step you can take to try it out.
- Use this final prompt to ask the AI for the biggest benefit and your first action. Be ready to share your key takeaway and this concrete next step with the class.

Step 6: Draft Your Business Brief

15 min

Turn your redesign into a one-page pitch

- You have a validated redesign. Now create the document that gets it funded.
- The AI will help you structure a Business Brief:
  - The Problem — What's broken and what's it costing?
  - The Solution — What AI enhancement fixes it?
  - The Impact — What's the expected benefit?

Share Your Plan

10 min

Share your complete plan with a partner.

- **Walk them through:**
  - The workflow you redesigned
  - The pain points you identified
  - The AI enhancement you're proposing
  - Your Business Brief
  - Your first move to test it
- **Then ask each other:**
  - "Would you approve this?"
  - "What question would your manager ask?"
  - Commit: Who will you send this to? When?

Debrief

10 min

Class discussion

Reflect on the full process:

- What surprised you about your redesign?
- Where did AI add the most value during the process?
- Which step was hardest? Which was most valuable?

Insights and Action

1 min

Reflect

Think about your current organization and a specific AI use case you'd like to implement. Which organizational type best describes your workplace: High-control, hybrid, or high-autonomy? What concerns or objections would your manager most likely raise about your AI proposal? Write about one specific conversation you could have in the next two weeks and what you'd need to prepare to increase your chances of getting a "yes."

Apply

Ask AI: "I want to implement [describe your AI use case] at my [describe organization type]. My manager's main concerns are likely [list 2 – 3 concerns]. Help me craft a 60-second elevator pitch that addresses these concerns and positions this as a low-risk pilot that demonstrates clear business value. Include specific metrics I should track."

Lesson Review

You can:

- Use a six-step method to redesign a personal workflow with AI
- Create a Business Brief that positions your redesign for approval
